

## Leather Double Wrap Clasp Instructions

To prevent losing your new bracelet this clasp has been designed not to come apart easily while in use. It is a little tricky at first but once you get the hang of it you will be good to go...

### **Clasping**

You should first experiment with opening and closing the clasp before wearing the bracelet to get a feel and understanding of how it works.

- ✓ With the logo facing up pinch the ends of the metal clasp with your index finger and thumb, simply pull the logo straight up while holding the other side stationary. Don't twist the clasp, use a gentle touch...it will slide up. Be careful your fingers are not preventing the clasp from sliding up or down

### **Applying to your wrist**

1. Once you have a basic understanding of how the clasp works...
  - ✓ Wrap the leather around your desired wrist so that the first wrap is tight (you will then have plenty of slack) take your two fingers and gently clasp it together. Once lined-up the clasp ends will meet straight together; force will not help.

### **Un-clasping**

1. Simple take your two fingers and push one side up and the other down, not to the side.
  - ✓ Make sure to have plenty of slack and that your fingers are not preventing the clasp from sliding up or down...be gentle.

Enjoy your bracelet...you'll get the hang of it.
