

www.ionloop.com

Congratulations you are now the owner of America's only Sport Watch that delivers both Negative Ion Technology + Magnets. Your unique watch has been designed to provide all the amazing benefits of these two technologies.

Quick Start Guide: Simply pull the stopper from the watch stem and push it down to start the timepiece.

To set the date/time pull the stem out and wind the watch hand until you have the correct date/time displayed in the small box. Ion<Time batteries should always be replaced by a professional to maintain the 10 ATM water resistance feature.

Warranty: This Ion<Time watch is guaranteed for 2 years against manufacturing defects, and will be repaired by the company. Any damage caused by an accidents or normal wear and tear will not be covered. Batteries and their installation by a professional are the responsibility of the owner. To maintain the appearance of your Ion<Time always rinse off your watch after swimming in salt water, chlorine or after contact with alcohol, cologne, detergents, or sun cream.

Warning: Do not use this product if you are pregnant, have a pacemaker or any other medical device within your body. Always keep magnet products away from small children and consult a doctor immediately if a magnet is swallowed. IonLoop simply claims to contain negative ion properties and does not claim a medical benefit to the user.
